+92 302 0141810 | Wahajulislam6@gmail.com | in/wahaj-islam

I am an Electrical Engineer experienced in power systems, site executions of LV/MV systems and EPC coordination, alongside focusing on BMS & ELV systems. I have conducted precise material take-offs and optimizing BOQs for large-scale projects as well as working on smart building technologies, automation protocols and integrated security systems to drive efficiency in modern electrical infrastructure.

## Professional Experience:

### Electrical Engineer

(JUL 2026 - PRESENT)

Inaam Energy Corporation, Lahore

- Prepared engineering drawings (SLDs, layouts, schematics), BOQs and technical submittals while ensuring compliance with IEC, IEEE, NEPRA & NTDC.
- Communicated directly with foreign suppliers, vendors, and EPC contractors to support bid preparation, procurement and overall project requirements.
- Supported the installation, testing, and commissioning of LV/MV/HV switchgear, substations and transformers while upholding site safety and actively participating in FAT and SAT across the globe.

### Electrical Engineer

(JAN 2025 - JUN 2026)

AL Awan Electric Works & Construction Co, Lahore

- Designed Electrical Layouts for major MEP/HVAC projects, ensuring installation aligned with approved drawings and consultant specifications.
- Analyzed and worked on the requirements of ELV systems, including CCTV, Access Control, and Fire Alarm Systems, ensuring seamless integration.
- Assisted in the onsite deployment of BMS field devices (sensors, actuators, and DDC controllers), verifying the hardware meet design specifications.

#### Projects:

- Electrical & Planning:** OGDCL House, Islamabad | EXPO Centre, Peshawar | Sindh Forensic Science Lab, Karachi
- Site Supervision:** High Court Lifts, Lahore | Mayo Hospital Lifts, Lahore | Model Town Courts Lifts, Lahore | Punjab Education Foundation Lifts.

### Electrical Estimation Engineer

(JUN 2022 - DEC 2024)

Cascade Engineering Associates (PVT) Ltd, Lahore

- Executed detailed electrical and HVAC material take-offs for international projects using PlanSwift and Bluebeam Revu.
- Prepared Bill of Quantities (BOQ) and cost estimates for tender submissions, analyzing architectural drawings to calculate precise material requirements.
- Managed site documentation including inspection requests (RFI) and material submittals to ensure full project traceability.

#### Projects:

- Estimation & Take-offs:** 410 Markham Street SW, USA | Hannaford Supermarket & Pharmacy, USA

## Technical Skills:

- Electrical Design:** Voltage Drop Calculations (NEC/IEC), Load Flow Analysis, Short Circuit Analysis, Single Line Diagrams (SLD), Cable Sizing.
- BMS & ELV Systems:** BMS Architecture, DDC Controllers, Sensors & Actuators, CCTV, Access Control, Fire Alarm Systems, and Structured Cabling.
- Estimation & QS:** PlanSwift (Digital Take-offs), Bluebeam Revu, BOQ Preparation, Vendor Cost Analysis, Variation Orders.
- Software Proficiency:** AutoCAD Electrical, ETAP, MATLAB, AutoCAD MEP, Revit MEP, Microsoft Office Suite (Excel Advanced).
- Codes & Standards:** Compliant with IEC Standards, NFPA 70 (NEC) for US Projects, and local Building and Power System Codes.

## Managerial & Soft Skills:

- Project Leadership:** Cross-functional Team Leadership, Site Supervision & Safety Compliance.
- Operational Efficiency:** Resource Leveling, Material Wastage Reduction, Just-In-Time (JIT) Procurement, Risk Assessment & Mitigation.
- Communication:** Technical Report Writing, Interdisciplinary Coordination (Mechanical/Civil).

## Education & Research:

### Masters in Electrical Engineering

(SEP 2025 - PRESENT)

University of Engineering & Technology, Lahore

**Specialization:** Power Systems & Building Engineering

**Thesis Track:** “Intelligent, Occupancy Aware Energy Management in Buildings.”

### Bachelors in Electrical Engineering

(OCT 2018 - AUG 2022)

University of Engineering & Technology, Lahore

**Specialization:** Industrial Automation & Renewable Energy

**Final Year Project:** “Design & Implementation of Reverse Vending Machine Using SSD & Deep Learning Algorithms.”

## Certifications:

### Industrial Power Systems Analysis and Stability Specialization

(NOV 2026 - DEC 2026)

Coursera, Online

### Engineering Project Management Specialization

(SEP 2026 - OCT 2026)

Coursera, Online

### Building Energy Systems Engineering Specialization

(JUL 2026 - AUG 2026)

Coursera, Online
